

## FORMATO ESPECIAL

Fabricada a partir de um composto termofixo de resina poliéster reforçada com fibra de vidro, a Telha Translúcida de Fibra de Vidro possui alta durabilidade e boa resistência a corrosão e ação de agentes químicos.

Com objetivo principal de propiciar economia de energia, a Telha Translúcida Especial Afort pode ser utilizada tanto na cobertura quanto para fechamento lateral de galpões e construções em geral, pois pode ser fabricada para casamento com qualquer modelo de telha de cobertura existente no mercado, sendo possível a escolha de diferentes acabamentos, espessuras e cores.
